## Supported Languages

The iPass SmartConnect Client for Android is available in English, Simplified Chinese, Traditional Chinese, Dutch, French, German, Italian, Japanese, Korean, Brazilian Portuguese, Russian, Spanish, and Thai.

## Resolved Issues

This version of the iPass SmartConnect Client for Android resolves following issues:

Issue ID	Description	Resolution
OMA-1864	Client is sending "Null" userid in the SQM Record	Fixed
OMA-1734	iPass client occasionally displays 'connecting to unknown ssid' in the dashboard during connection	Fixed
OMA-1724	When connecting to Starbucks WiFi and connection client prompts Login button which is not functioning	Fixed: Now the client prompts user to 'launch browser' or 'disconnect'. On tapping 'launch browser' user has the option to connect.
SCA-1327	When Personal network key saved in OS WiFi settings, then if the connection attempted from iPass WiFi settings, client again prompts for the WiFi key.	Fixed: Now the client no longer prompts for the network key if it's already been entered in OS Wi-Fi settings.
OMA-1844	When Battery Saver is ON, after successfully connecting to Non iPass network from device settings, client prompts the notification to connect to internet. On launching the client, it shows internet not available.	Fixed: Client no longer prompts user to connect in this situation.
OMA-1673	Open Access Networks are shown with iPass logo in the Network list	Fixed
