

iPass SmartConnect Client for iOS v3.17.1 Release Notes

DECEMBER 5, 2017

New Features and Enhancements

3.17.1 iPass SmartConnect Client for iOS adds the following features:

- Enhanced and improved Hotspot Finder as follows:
 - Map view displays clusters and groupings of hotspots. Makes it easier for users to see overall coverage in a particular location.
 - Personal hotspots are displayed in a manner that maintains privacy of hotspot owner.
 - Reduced app size for offline mode. Users can now select an arbitrary map area (e.g. a city, metro area or state) for offline use. Previous versions limited users to selecting entire continents which used a large amount of device storage for offline use
- Enhanced app reporting logs. This will result in better identification and resolution of problems that may be experienced by users.
- Improved 802.1x support.
- Integrated SmartConnect SDK into the SmartConnect Client.
- Swift 3.2 support added.
- Xcode9 support added.

Affected Components

- All components

System Requirements

3.17.1 iPass SmartConnect Client for iOS has the following requirements:

- iOS 9.0 or later
- iOS multitasking support. Examples: iPhone 5 or later, iPod Touch third generation or later, or iPad second generation or later
- Users need an iPass account in order for the service to function as well as be connected to the Internet (by Wi-Fi or Mobile Broadband) to activate iPass

Supported Languages

The iPass SmartConnect Client for iOS is available in English, Simplified Chinese, Traditional Chinese, French, German, Italian, Japanese, Korean, Brazilian Portuguese, Russian, Spanish, and Thai.

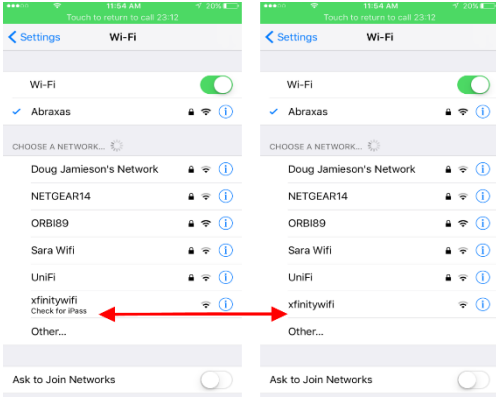

Resolved Issues

iPass 3.17.1 resolves the following issues:

Issue ID	Description	Resolution
OMI-1879 OMI-1877 OMI-1691	Issues identified when porting the client to iOS11. <ul style="list-style-type: none">• iPass one-click activation not working from Safari.• iOS location services access dialog displayed multiple times.• iOS notifications were not displayed during connection.	Fixed
OMI-1311 OMI-1193	Fixed issues encountered when connecting to networks on the 'Excluded Networks' list in the client	Fixed.

Known Issues

Issue ID	Description
OMI-1690	<p>There is a bug in the iOS 11 release from Apple that may affect some end users of apps that contain the iPass SmartConnect SDK.</p> <p>THIS HAS BEEN FIXED BY APPLE IN iOS version 11.2. If you are not yet using this version of the OS, please read on:</p> <p>End users may not see the “Check for iPass” annotation underneath iPass networks when selecting a network from the iOS “Settings/Wi-Fi” scan list (see xfinitywifi example below).</p>  <p>This issue is due to a problem with iOS 11 and not the iPass SDK. This a broader issue that is also affecting other apps. The problem is intermittent and may only affect certain versions of the iPhone. There is no workaround identified at this time.</p> <p>THIS HAS BEEN FIXED BY APPLE IN iOS version 11.2.</p>
