Open Mobile 3.0.2 for iOS Release Notes

VERSION 1.0, MARCH 2013

These release notes contain the latest news and information about iPass Open Mobile 3.0.2 for iOS.

New Features and Enhancements

iPass Open Mobile 3.0.2 for iOS has the following new enhancement:

- **Manual Login:** Users can create a list of networks that Open Mobile should not log in to (requires iOS 6.0 and later).

System Requirements

iPass Open Mobile 3.0.2 for iOS requires the following:

- iOS 4.3 or later.
- iOS multitasking support (for example, iPhone 3GS or later, iPod Touch third generation or later, or any iPad).
- Users need an iPass account in order for the service to function. In addition, the user must be connected to the Internet (by Wi-Fi or Mobile Broadband) to activate Open Mobile.

Supported Languages

Open Mobile is available in English, French, German, Spanish, Italian, Korean, Japanese, Thai, Simplified Chinese, and Traditional Chinese.

Resolved Issues

Issue ID	Description
120140	On the Recent Connection page (in German), "Letzte Verbindegen" text is no longer cut short.

Known Limitations

iPass Open Mobile 3.0.2 for iOS has the following limitations:

Issue ID	Description
117751	On branded clients with iOS versions 5.0 or earlier, the app navigation bar does not reflect the modified Navigation Bar Color of the branded client.
117543	The PIN field does not support entry using a non UTF-8 keyboard.
117522	When Open Mobile is installed on an iPad, location services are enabled in device **Settings**.
115964	If Open Mobile is running in the background and the device is switched off, data usage that occurred while Open Mobile was running in the background will not be counted correctly.
n/a	Open Mobile will cache a DHCP-assigned IP address. However, when later attempts to connect are made, no attempt is made to determine if the IP address is valid. As a result, some connections may fail unless the DHCP address is manually refreshed.

Known Issues

There are no customer-impacting issues specific to the 3.0.2 release.
