

Open Mobile 1.4.2 for Windows Release Notes

VERSION 1.1, MAY 2011

Open Mobile 1.4.2 is a maintenance release that resolved several open issues. No new features or enhancements are included in this release.

For a complete list of current technical requirements, known issues, and limitations, consult *the Open Mobile 1.4.1 for Windows Release Notes*, available from the Open Mobile Portal.

Upgrading to 1.4.2

No automatic upgrade to version 1.4.2 is available through the Open Mobile Portal. Open Mobile version 1.4.2 must be installed manually.

Open Mobile version 1.4.2 can be installed over an existing installation of Open Mobile 1.4.1 without uninstalling version 1.4.1 first.

Resolved Issues

This release of Open Mobile resolves the following issues.

Issue ID	Description
109370	Network jitter will no longer be experienced reported when the iMobility service is running.
110904	At some font settings, the Open Mobile credentials dialog would become disabled and unusable. In the Windows Control Panel, under Display , make sure the font size setting is set to 100%.
108820	An issue has been resolved where after resuming from sleep/hibernate mode, Open Mobile service initialization could loop indefinitely. Open Mobile will no longer loop in these circumstances.
